

YASIR ARFAT

Software Engineer | MERN Stack Developer | Generative AI

📍 Hyderabad, Telangana 📞 +91-8125961792 ✉ yasir.arfat.cse@gmail.com

🌐 LinkedIn 🐙 GitHub 🔑 LeetCode 🌐 Portfolio

Summary

Computer Science undergraduate (2027) specializing in Full Stack (MERN) development and Generative AI, with hands-on experience in building scalable web platforms and RAG-based AI systems using AWS Bedrock and LangChain. Passionate about developing high-performance backend architectures and AI-powered applications that deliver meaningful real-world impact.

Education

- Malla Reddy Engineering College** **2023 – May 2027 (Expected)**
B.Tech in Computer Science (CGPA: 8.5/10) *Hyderabad, India*
- Kendriya Vidyalaya** **2021 – 2023**
Senior Secondary (77.5%) *Hyderabad, India*

Technical Skills

- Languages:** C++, JavaScript, Python, Java
- Frontend:** HTML, CSS, React.js
- Backend:** Node.js, Express.js
- Databases:** MongoDB, MySQL
- Generative AI:** RAG, LangChain, FAISS, LLMs, AWS Bedrock
- Tools & Cloud:** Git, GitHub, AWS EC2, Postman, VS Code
- CS Fundamentals:** DSA, DBMS, OS, OOPS, Computer Networks

Projects

- Conversational RAG PDF Q&A System using AWS Bedrock** (Python, LangChain) [GitHub] [Live]
 - Designed and deployed a scalable conversational RAG system enabling semantic search across multi-document PDFs.
 - Implemented FAISS-based vector indexing with Amazon Titan embeddings for efficient similarity retrieval.
 - Integrated LLaMA-3 via AWS Bedrock to generate context-aware responses with reduced latency.
 - Deployed on AWS EC2 with secure IAM configuration ensuring production-ready access control.
- Syllabus Management System** (JavaScript, React, Node.js, Express, MongoDB) [Frontend] [Backend] [Live]
 - Engineered a role-based MERN platform supporting admin CRUD operations and secure student access.
 - Implemented JWT-based authentication and protected REST APIs for secure data handling.
 - Structured MongoDB schema for scalable syllabus and module management.
 - Deployed frontend on Netlify and backend on Render ensuring seamless client-server integration.
- AI-Powered Recruitment & Interview Platform** (React, Express.js, Socket.io, Gemini AI) [GitHub] [Live]
 - Developed an AI-driven recruitment platform featuring automated resume scoring and structured candidate evaluation.
 - Built real-time interview system using Socket.io for interactive AI-based candidate assessments.
 - Implemented resume parsing pipeline to extract skills, experience, and structured candidate insights.
 - Designed analytics dashboard for HR to track candidate performance and ranking metrics.

Certifications

- Microsoft Certified: Azure AI Fundamentals – Credential
- SQL (Basics) – HackerRank – Credential
- Generative AI – Udemy Credential
